**VI. Executive Director’s Staff Report**

Executive Director Buehlhorn added that there are some problems with the electronic equipment with the lighting for the fountain, reviewing options this Thursday, August 14.

Director McDowell asked about a completion date for the Overlook. Executive Director Buehlhorn stated that we would like to say late September. He also wants to make sure all is done before we set a date for a dedication.

President Peters inquired about the percentages on the Illinois Funds accounts. Executive Director Buehlhorn explained that the rates are a daily rate and once you need it to be collateralized you lose a percentage. Director Kane explained that amounts up to $100,000.00 do not need to be collateralized. Executive Director Buehlhorn suggested that we take several investments of $100,000.00 and when the interest hits we roll the interest amount to another account. Director Byers suggested that we investigate the idea of changing our investments and to report back with suggestions for the next meeting.
Planner Bryan Werner presented a mock up sign for projects we have funded and explained that he has found a few sign making companies that have locked in a price for one year. It seems to be an issue with grant recipients regarding the signage for the completed projects. They expect MEPRD to supply the sign just like IDNR does for its projects. Director Kane noted that the signs from IDNR are a generic sign and in turn the MEPRD sign is more specific to each project. This would also make all the projects funded by MEPRD have a similar looking sign. It was suggested to make the signs out of steel not aluminum. Director Evans asked what the percentage was of negative feedback about the signs and Planner Bryan Werner explained that about half have had issues and very few have complained to the point to argue about MEPRD not supplying signs. President Peters asked for those individuals that are reluctant to do the sign, if it should come out of their grant. Planner Bryan Werner suggested we hold payment; due to the requirement per the contract that a sign is put up. Director Hogan asked if MEPRD would be supplying grantees the name of the companies or if Planner Werner would do the work. Planner Werner plans on just providing each grantee with the names of the companies they can go to and receive the signs and the discount.

d) **Report from District Engineers**

Engineer Bill Baudendistel added that in reference to Eagle Points Trail there was a meeting with the Corp of Engineers and they suggested for not only the Eagle Points Trail but for future projects on Chouteau Island the idea of entering into a challenge cost share program with the Corp of Engineers. Engineer Bill Baudendistel does not have all the details on what the Corp will provide; they are putting together a memorandum of agreement and it should be available by the next MEPRD board meeting. What we do know is that MEPRD will be doing an easement for the trails. The easement will be broke into three different tracks. The first track will be the southern portion, which will go from the parking lot just south of the canal bridge to the very southern end. The second track will be on the very north end; which is a project that hopefully will be funded thru IDNR, and the center tract connects those two. If we just stay with the easements the Corp could not offer to provide other facilities or other help to the projects. However, it is Bill’s understanding with the cost share program that they can not only provide physical things like signage, observation posts and things along that line but they can allow you to use their contracting ability. Engineer Bill doesn’t want this to seem better than it is; there are lots of details that still need to be worked out. One very good aspect is that it helps facilitate the construction of the project. It is basically turned over to the Corp after design; they approve it and have their contract services company do the work. Director Kane expressed his concern that MEPRD needs to take a project from design thru construction in a traditional manner for educational purposes if nothing else. Director Kane asked the question if MEPRD could still design and bid our projects and build on this easement without giving the money to the Corp and letting them manage the project. Engineer Bill Baudendistel replied that is correct. Director Kane is interested to hear more about this but feels that MEPRD has yet to see a project through. Executive Director Mike Buehlhorn stated that the corporate office was the only one at this time. He also asked what the advantage would be to do this and Engineer Bill Baudendistel replied that he would have to see the Corp memorandum of agreement first before he could state the advantages. Director Kane asked what unit prices MEPRD would be using, current prices or prices that were bid four years ago. Engineer Bill Baudendistel stated he believed that they were on the first year of a five year bid cycle with this particular contractor. Director Kane asked how MEPRD would control the construction and the response was that the Corp actually provides quality control. Director Hogan made it aware that she had some concerns. Director Kane believes that it would be good for the MEPRD staff to take a project from beginning to end because there are lots of things that occur along the way that would be a great learning tool for everyone. Director Evans asked if the Corp would hold it against us if we don’t go along with this and Executive Director said he believes it will have no effect. President Peters asked where this will go now and Engineer Bill Baudendistel stated that he should have the memorandum by the next board meeting and a draft of the cost share agreement.

Engineer Paul Homann restated the fact that we received bids for the 16 LCD lights on the fountain.
Director Kane brought up the facility use policy and believes it is a good start but wants to make sure that MEPRD keeps in mind that this is pretty all inclusive as to who can use this facility. Executive Director Buehlhorn stated that this policy has been brought before the Board several times and President Peters stated that it was his plan to get this policy ready. Director Hogan expressed her concern with the fact that the policy states no weddings and functions along that nature. Executive Director Buehlhorn stated that he feels like we would be taking away from other business if we did rent the facility for such purposes. President Peters would like to see the facility used but does not agree with the rental for various private functions. Planner Bryan Werner also brought up the fact that additional personnel would have to be on hand for private functions and thought the Board should consider those additional costs when making their decisions.

Director Kane mentioned that Great Rivers Greenway is beginning to update their long range plan, and thought we could coordinate efforts.
